DETAILED ACTION

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 19 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear what is the claimed invention: a closure cap or a process of making a closure cap.

Claim Objections

3. Claims 1, 5 and 6 are objected to because of the following informalities:

In claim 1, line 2, "which a container aperture of a container" should be -- which said container aperture of said container --.

In claims 5 and 6, "a fin sealing device" should be -- said fin sealing device --.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Poore et al. (4,782,964). Poore et al. disclose, in fig. 1, a closure cap for a container comprising a closed wall section 29 having a fin sealing device with two fins 34, 35, a

6. Claims 1-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Neiger. (5,853,093). Neiger discloses, in figs. 2-4, a closure cap for a container comprising a closed wall section 62 having a fin sealing device with two fins, a cap body 22, a hinged lid 24, a discharge aperture (see fig. 2), and a second closed wall section 30 having a thread.
